CODE 2 CAREER

Our mission

CDK Global Code2Career is committed to providing internships for high school students to increase their passion for technology while challenging boundaries in computer science, innovation and teamwork.

Who we are

CDK Global is one of the largest technology providers to the automotive industry, with more than 26,000 dealer sites in over 100 countries and nearly 9,000 employees worldwide. Plus, we've been doing this for over 40 years. Though we're stable, we also pride ourselves on our agility. We're fast, we're modern and we're innovative. We're solving problems that haven't even been considered yet. We're shifting to an open-office environment that fosters innovation and collaboration. It's a truly exciting time to be here.

About the program

Code2Career is an 8-week paid summer internship program available to high school students in our four tech hubs: Seattle, WA, Portland, OR, Austin, TX and Hoffman Estates, IL.

Students will work with our own CDK Global engineers to program for various software projects, develop new features on our platforms, and gain exposure to real world applications. Interns will get an inside look at some of CDK Global's most exciting, emerging technologies, enjoy our fun culture and have the chance to create their end-of-internship project and present it to the leadership team.

In addition to gaining technical experience, interns will have fantastic opportunities to network with professionals, participate in company-sponsored social events, collaborate in a hackathon, engage in multiple workshops and create lifetime memories with other interns. The most important thing to us is that students have a passion for working on cool stuff.

As a **High School Software Development Intern** students will help to engineer the next generation of enterprise class software solutions at CDK utilizing a broad range of the latest technologies. The intern's primary responsibilities include development of services and components (design, coding, testing). The internship will provide hands-on technical experience and will work with other team members, architects and product owners in the early and continuous delivery of high quality software products that delight our customers.

What we're looking for

- Current Juniors graduating in 2018
- Minimum 3.0 cumulative GPA
- Successfully completed at least 1 software class
- A great attitude
- A drive to learn and innovate
- Passion for software
- The ability to work full time, 40 hours per week, for 8 weeks starting in June of program year

Diversity is a core value of CDK Global. We believe that our work environment is enhanced when diverse groups of people with diverse ideas come together. We strongly encourage women and underrepresented minorities to apply.

CDK Global is an Equal Opportunity Employer - Minorities/Women/ Veterans/Disabled. We believe that diversity in all aspects of business leads to strength.

CDK Global

To apply for this program please email **Dianna Chourarath** (Seattle or Portland) @ **dianna.chourarath@cdk.com** or **Molly Szabo** (Austin and Hoffman) @ **molly.szabo@cdk.com**
