

# WHY CONSTRUCTION?

**COMPETITIVE PAY** | Experience is an important contributor for every position, there are a multitude of ways for increased compensation: earning a degree, taking technical courses and on-the-job training. Starting at \$25+ an hour.

**TRAVEL** | The construction industry is worldwide. Many trades operating in different regions of the country and allowing for lateral moves, within the same company.

**ZERO MONOTONY** | A typical day does not include a 9 to 5 desk job but instead in the field and various locations. Construction progress is visible from day to day and challenges from yesterday can be different than the challenges faced tomorrow. These variables keep project teams on their toes and experiencing something new each day.

**VARIOUS SKILLS** | Construction has a wide array of focuses and varying skills each job depends on: carpentry, engineering, marketing, estimating, project management, to list a few. Every job requiring a different skill-set from the next, yet they work on a project collaboratively.

**TEAM WORK** | A solid team foundation network is formed as a project team works together.

**PROJECTED GROWTH** | "Construction is projected to add 790,400 new jobs by 2024. Employment is estimated to grow 10 percent from 2014 to 2024, faster than the average for all occupations, increasing from 6.5 million jobs to 7.2 million jobs." (Bureau of Labor Statistics, US Department of Labor)
