

MEET THE PANEL

CAROLYN SIZEMORE, Market Executive, Panel Coordinator

As Oregon and SW Washington's education market sector leader, Carolyn develops relationships with new customers and ensures our teams deliver on promises - from the project kick-off meeting to the last punch list item. She believes the best business relationships are built on trust and a true understanding of what makes each entity successful.

ANGIE HELFERT, Project Manager

Angie oversees the entire project from bid preparation through final acceptance by providing contract administration, procurement, subcontract awards, scheduling and costing, supervision of project, risk management and quality control. Angie enhances customer relationships by providing excellent service to the owner and project team.

CHLOE ROISUM, Project Engineer

Chloe's supports project administration, manages schedules and updates, implements Mortenson's Zero Injury program, administers subcontractors, supports procurement, and prepares billing. She is responsible for review and resolution of field coordination issues with project participants and team members.

NORA SCHNEIDER, Estimator

As an Estimator, Nora's responsibilities include preparation of initial target budgets, continuous cost trending as the design for projects is developed, value analysis, system cost analysis, and scheduling of both design and construction activities. Her knowledge and experience is invaluable as design, phasing, and material options are discussed, allowing value creation to be a proactive activity in the design process.

ANARTIS MCKERRAL, Integrated Construction Coordinator

Anartis leads the implementation and execution of the Virtual Design and Construction processes, including the use of Building Information Models (BIM). She creates real-time visualizations of all phases of project development to represent and communicate the design vision and constructability to integrated teams of owners, designers and builders.

TESS MASSARONI, Superintendent

Tess provides on-site field supervision, direction, and construction. She observes and interfaces with contractors to monitor work performance, progress, and productivity of crafts. Tess serves as the liaison between field engineers and contractors to ensure construction activities and results comply with drawings, specifications and quality standards.

LINDSAY VERDUGO, Community Affairs Specialist

Lindsay is the Community Affairs Specialist for the Portland operating group and works to maximize opportunities for small, minority, women, disadvantaged and veteran-owned businesses (SMWDBE/VOSB). She enhances cross-culture understanding through the development and implementation of diversity, equity and inclusion initiatives, managing outreach and educational workshops to promote understanding and increase SMWDBE/VOSB participation and utilization on construction projects.

GABI KOVAC-COWAN, Laborer

Gabi is a skilled worker who does much of the physically demanding labor in all kinds of construction projects. She uses a variety of hand and power tools to complete her daily tasks. Depending on the project and construction phase, Gabi might prepare a worksite, dig trenches, or mix and place concrete.
